District(s):

Project Description

Principal's Priority

1

Purchase of two mobile learning stations containing 15 laptops each, associated wireless hub, sufficient hard drive space for saving ongoing student projects and peripherals such as headsets.

Benefits if Project is Funded

Students will be able to develop 21st century skills in the context of concept development within instruction rather than as a stand alone activity. Students will be encouraged to develop conceptual understanding within a system approach to teaching. Learning will be facilitated through the use of modern tools.

Impacts if Project is not Funded

If this project is not completed, students will not garner the benefit of modern tools in the conceptualization of their course work. Technology will remain a compartmentalization portion of their school day rather then being an intrinsic component. The school environment will continue to be deficient in the technology they so adeptly utilize in their personal spheres.

of Students impacted by project 290

Project Start Year 2010
Project Finish Year 2010

Project has matching funds are available No
Project has prior state funding available No

Project has federal funding available No

Project has has a public review process Yes Capital Request Advisory Committee
